

### **JMCS Social Media Conduct Policy**

Recognizing that collaboration is essential to education, John Muir Charter Schools (JMCS) and/or client agencies may provide users with access to “Social Media” web sites or tools that allow communication, collaboration, sharing, and messaging among users.

Students and staff are expected to communicate with the same appropriate, safe, mindful, and courteous conduct online as is expected offline. Conduct on social media will be held to the same standard as conduct in the classroom, safe and respectful. Posts, chats, sharing, and messaging may be monitored. Users should be careful not to share personally identifying information online.

#### **Social Media Conduct Student and Staff Guidelines**

Students will engage in respectful usage of social media in regard to JMCS or the client agency program.

Students have the right to engage in appropriate discussions and content hosted by JMCS or client agency social media.

Students may not post sexual, profane, personal or derogatory material on JMCS or program partner social media accounts.

Students will be held responsible if engaging in secondary commentary on social media (making a comment on another student’s inappropriate comment).

Students may not post images, videos or otherwise of other students or staff without expressed permission.

Students do not have the right to privacy when using JMCS equipment and software. If a student is engaged in inappropriate online behavior in any context, they may lose privileges to use equipment and software and face other consequences.

JMCS staff is also expected to use social media in responsible and appropriate ways.
